

## Build a bank LAB visit

The TY Build a Bank team visited the LAB (Learn About Banking) exhibition recently in the branch on Dyer Street. Here, they managed to get a glimpse at the modern and convenient methods of banking already available in the bank and at the new technology being created at the AIB creation offices in Dundrum. There were also many chances to win prizes and play banking connected games. Great fun was had by all of the bank team and it was very beneficial to visit the exhibition before the Regional Finals in February.
